Office Action Summary

Art Unit: 3753

This action is responsive to the communication filed March 8, 2001.

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-13, drawn to an incubator, classified in Class 600, subclass 22.

II. Claims 14-19, drawn to a mattress, classified in Class 5, subclass 603.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. (M.P.E.P. § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed in that it is claimed without the recitation of such particulars. The subcombination has separate utility such as a camp mattress.

Because these inventions are distinct for the reasons given above and the examination required for each Group is not the same as for the other Group(s) restriction for examination purposes as indicated is proper.
